Here is a **complete Notion template** you can copy-paste directly into your workspace.
It is designed specifically for **M.Tech dissertation writing**, with:

✔ Chapter-wise structure
✔ Progress tracking
✔ AI-assisted workflow blocks
✔ Sections for experiments, results, literature survey
✔ Prompts for ChatGPT, Gemini, NotebookLM inside the template
✔ Daily writing planner

---

# ✅ NOTION TEMPLATE FOR M.TECH DISSERTATION WRITING

(Just copy-paste into a new Notion page. All toggle blocks, checkboxes, and databases will appear properly.)

---

# 📘 M.Tech Dissertation Workspace

---

## 🏁 Project Dashboard

### 🟦 Overall Progress

- Chapter 1 – Introduction
- Chapter 2 – Literature Survey
- Chapter 3 – Methodology
- Chapter 4 – Experimental Setup
- Chapter 5 – Results & Analysis
- Chapter 6 – Conclusion & Future Work

- Formatting + Proofreading
- Final Submission

---

## 📂 Chapter Database

Create a database called **“Chapters”** with these columns:

**Properties:**

- **Chapter Title (Title)**
- **Status (Select):** Not Started / Notes Ready / Drafting / Review / Completed
- **AI Support Needed (Multi-select):** GPT / Gemini / NotebookLM
- **% Progress (Number)**
- **Associated Files (File)**
- **Notes (Text)**

Create 6 entries:

- Introduction
- Literature Survey
- Methodology
- Experimental Setup
- Results & Discussion
- Conclusion + Future Work

---

# 🗂️ CHAPTER WORKSPACES

Each chapter has a ready-to-use template below.
Create a page inside your database → Paste the relevant template.

---

# 📘 CHAPTER TEMPLATE (Use for Each Chapter)

## 📌 Chapter Title: {{Title}}

**Status:** {{Status}}
**Progress:** {{%}}%

---

## 1. 📝 Purpose of This Chapter

(Write in 1–2 lines what this chapter covers.)

---

## 2. 📚 Inputs Required

- Notes
- Research papers
- Plots/Results (if applicable)
- Figures to include
- Code references

---

## 3. 🗂️ Structure

- Section 1
- Section 2
- Section 3
- Summary

(*Modify depending on chapter*)

---

## 4. 💡 Your Raw Notes (Dump Zone)

Add all rough points, messy thoughts, copied snippets from papers (your own words), equations, diagrams, results, screenshots — **everything here first**.

---

## 5. 🤖 AI Workflow Section

### 🔵 NotebookLM – For Grounded Facts

Toggle block:

**Summarization Prompt:**
"Summarize the following uploaded papers into: Problem, Methodology, Results, Limitations. Use only the provided PDFs."

**Comparison Prompt:**
"Create a comparison table for all uploaded papers with Technique, Dataset, Performance."

**Extraction Prompt:**
"Extract all important definitions and formulas used across the uploaded documents."

---

### 🟣 Gemini – For Understanding + Validation

**Concept Clarity:**
"Explain this concept in depth but concisely. Keep it technically correct."

**Validation:**
"Here is my summary of a paper/method. Identify any incorrect or unclear points."

**Reasoning:**
"Explain why [X] method performs better than [Y] based on known theory."

---

### 💙 ChatGPT – For Writing + Structuring

**Rewrite Safely:**
"Rewrite these points in clean academic language without adding new facts."

**Structure Builder:**
"Organize these notes into a proper chapter structure with headings and subheadings."

**Polish:**
"Improve flow, grammar, and clarity but do not change the meaning."

**Figure/Diagram Text:**
"Write a caption for this figure based on the following explanation."

---

## 6. ✍️ Draft Section

(Add your rewritten chapter content here after using the prompts)

---

## 7. 📝 Revision Checklist

- No unsupported claims
- All citations are real and verified
- No AI-generated references
- All algorithms/results are my own
- Language academic and clear

---

## 8. ✔ Final Version

Paste your final chapter version here before exporting to Word/PDF.

---

# 📊 EXPERIMENT & RESULTS DATABASE

Create a new database **“Experiments & Results”**:

**Properties:**

- **Experiment Name**
- **Model/Method Used**
- **Dataset**
- **Date**
- **Accuracy / Metric**
- **Charts (Files)**
- **Notes**
- **Status: Completed / Pending**
- **Include in Thesis: Yes/No**

---

# 🧠 Literature Survey Database

Create a table **“Literature Survey”**

Columns:

- **Paper Title**

- **Authors**
- **Year**
- **Technique**
- **Dataset**
- **Performance**
- **Limitations**
- **Key Notes**
- **PDF File**
- **Tags**

Paste NotebookLM summaries here.

---

# 📅 DAILY WORKFLOW TEMPLATE

Create a page called **Daily Dissertation Plan**:

---

## 📅 Daily Research Plan

### 1. 🎯 Today's Goal

- [ ]

### 2. 📚 Papers to Review

- [ ]

### 3. 🤖 AI Tool Use Plan

**NotebookLM:**
→ Extract summaries

**Gemini:**
→ Understand algorithms

**ChatGPT:**
→ Rewrite & polish section

---

### 4. ✍️ Writing Block (Deep Work)

- 50–90 minutes focused writing
- 10-minute break
- Repeat 2–3 cycles

---

### 5. 📈 What I Completed Today

- [ ]

---

### 6. 🔁 What to Continue Tomorrow

- [ ]

---

# 🧾 READY TO IMPORT?

If you want, I can create:

✔ A **Notion export (.zip)**
✔ A **ready-made database layout screenshot**
✔ A **cleaner, minimal theme version**
✔ A **kanban-style thesis progress tracker**

Just tell me, and I’ll generate it.
